DETAILED ACTION

1. The examiner of the application has changed. This case has now been transferred as of 5/23/2002. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Christopher Yaen, Group Art Unit 1642.
2. Amendment to the claims have been entered. Claims 24-30 have been canceled, claims 22-23, and 31-54 are being considered in this Request for Continuing Reexamination and will be considered on the merits.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claim 22 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 22 is drawn to a method of detecting the presence of a target polynucleotide, by contacting the test sample with at least one purified polynucleotide and detecting the presence of said target polynucleotide, wherein the purified polynucleotide is selected from a group consisting of SEQ ID No: 1,4,5,8, and 10.

Although the specification is adequately descriptive in regards to SEQ ID Numbers, it is virtually silent with regards to the isolation and description of the said purified

polynucleotide. Currently, as interpreted, the purified nucleotide of claim 22 can encompass a purified polynucleotide that includes more than the instant application has envisioned. The "purified nucleotide", reads on sequences not identified and isolated by the applicant. It is advised by the examiner to revise the "purified polynucleotide" to consist of the group consisting of SEQ ID No: 1, 4, 5, 8, and 10.

Conclusion

Claim 22 is rejected. Claims 31-54 is free of the art and contains allowable subject matter.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher H Yaen whose telephone number is 703-305-3586. The examiner can normally be reached on Monday-Friday 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anthony Caputa can be reached on 703-308-3995.
